

**Congratulations on the purchase of your ESDEX device! You have chosen a professional, future-oriented ESD testing solution. To ensure a quick and trouble-free start, please carefully review the following information and read the User Manual thoroughly before operating the system.**

### Safety Notices

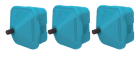

- ▶ Read the user manual carefully before operating the device.
- ▶ This is a high-voltage device. It must only be operated by trained and qualified personnel.
- ▶ The ESDEX must always be connected to an RGP (Reference Ground Point) during operation!
- ▶ Make sure the latest ESDEX Firmware is installed before using the device.

### Whats inside ?

ESDEX  
Mainframe

RC-Networks  
(as ordered)

Discharge  
Tips

Earth Cable  
2m

Battery Pack

Fast Charger  
& USB-Cable

USB Stick

Mini  
Screwdriver

### First Steps with ESDEX

#### 1 Mount Battery into ESDEX

- 1.) Turn the generator upside down.
- 2.) Open the battery compartment by loosening the retaining screw with a screwdriver.
- 3.) Insert the battery.
- 4.) Close the battery compartment and secure it again by tightening the retaining screw.

#### 2 Activate Battery

- 1.) Connect the battery to the charger to deactivate the transport mode
- 2.) The LED on the ESDEX lights up when transport mode is deactivated

#### 3 Switch On ESDEX

Press and hold the trigger until the screen appears, then release it. The generator will power on.

#### 4 Switch Off ESDEX

- 1.) Press and hold both side buttons simultaneously for 1 seconds.
- 2.) A confirmation window will appear on the display. Confirm the shutdown to switch off the generator.
- 3.) Alternatively, you can switch off the generator using the on-screen soft button in the display menu.

#### 5 Insert / Remove RC module

**MODULE INSTALLATION:** Align the module according to the top-side marking on the module. Insert the module into the ESDEX and push it. Lock the module using the slider button.

**MODULE REMOVAL:** Unlock the module and pull it straight out of the ESDEX.

**IMPORTANT:** Do not install or remove a module while a sharp tip is attached.

#### 6 ESDEX Grounding

- 1.) Connect the delivered earth cable to the generator
- 2.) Connect the other end of the cable the reference ground plane
- 3.) Make sure that the cable is not broken bevor use.

# Software Options License Activation

To enable software options, enter the license key in the device settings menu. Your License Key is stored on the USB Stick, delivered with the generator.

**Navigation:**

Menu → Settings → Generator → License → Enter License

**Input format:**

Enter the license key as a continuous string without hyphens or separators.

**Example:**

A1B2C3D4E5F6G7H8
