

SME HV-AN 150 SHIELDED METAL ENCLOSURE FOR HV-AN 150

- Rugged design, stainless steel
- Individual access to each HV-AN
- Full screening using screened room door technology
- Size matched to 19" rack mounting
- Flexible HV connection
- Replaceable media panels for customized applications

The shielded metal enclosure (SME) is designed to contain two High Voltage Artificial Networks, HV-AN 150 according to ISO/DTS 7637-4 and the HV part of CISPR 12 (draft), CISPR 25, ECE No. 10 R05/06 and ISO 11452-1. It is applicable to all electrical vehicles, i.e., battery, hybrid or plugin electric vehicle. The design of the SME HV-AN 150 allows easy handling when connecting the coaxial HV + and HV lines to the HV-AN. The cable shield is contacted over a large area through the massive terminals. The inner conductor is strain-relieved by the cable gland and led to the connections of the HV-AN. The SME HV-AN 150 allows the two individual HV AN-150 to be directly connected to the ground plane and allows access to each HV AN. In addition to the box, the scope of delivery of the SME HV-AN 150 includes two RF cables and two connection brackets. The HV-AN 150, the calibration option and the external 10 µF for RTCA/DO-160G must be ordered separately.

Individual access to each HV-AN

Flexible HV connection

High voltage part of the following standards:

- CISPR 12, CISPR 25
- ECE No. 10 R05/R06
- ISO/DTS 7637-4
- ISO 11452-1
- And other Automotive standards

Full screening using screened room door technology

Size matched to 19" rack mounting

Technical specifications

Connectors front panel	2 x N (female)
Weight (empty)	21 kg (approx.)
Weight (with 2x HV-AN 150)	31 kg (approx.)
Dimensions (LxWxH)	480 x 413 x 225 mm

SME HV-AN 150 SHIELDED METAL ENCLOSURE FOR HV-AN 150
